

Magic Industries offer a state of the art repair facility. Our shop houses the latest in high tech machining and test equipment. This infrastructure allows us to offer our clients the utmost in precision machining. It is not uncommon for our clients to drop ship equipment straight from the manufacturer to our facility to be worked and tested prior to being shipped on the job sites. All equipment repaired and rebuilt at Magic Industries is run through a full testing process to ensure all specifications are met. Quality and safety are never compromised.

Instrumentation Department

At magic Industries, our instrumentation Department services most all types of weight indicators, such as Seal Tite, Clipper, Hydromast, Type D, E, EB, FS and more. We also repair Hercules and National Anchors along with mud gauges, rotary torque gauges, and tong torque gauges. Certification on gauges is also available.
